RE: Work Package I Work Plan
Patrick Bayou Superfund Site – Deer Park, TX

Dear Mr. Allen:

As we have discussed, attached please find the Work Plan for Work Package I for the Remedial Investigation/Feasibility Study (RI/FS) at the Patrick Bayou Superfund Site in Deer Park, TX. The Work Plan has been prepared by Anchor Environmental on behalf of the Patrick Bayou Joint Defense Group. In general, Work Package 1 will include these major tasks:

1. Validation and verification that the existing environmental data available for the Site is acceptable to support subsequent efforts associated with the RI/FS risk assessment process
2. Development of preliminary data quality objectives (DQOs)
3. Evaluation of existing data to identify preliminary chemical of potential concern (COPCs)

As we discussed, this Work Plan will be followed by submittal of the General RI Work Plan. The early submittal will allow Anchor to develop information which will be used in future Sampling and Analysis Plans. We appreciate your assistance in this matter. Should you have any questions please feel free to contact me at 281-363-8733.

Sincerely,

s/R Piniewski
